Homeowner Operation and Maintenance Agreement Form

I, the undersigned, agree to abide by all rules and regulations regarding the installation and operation of a household sewage disposal system (HSTS), which include but are not limited to the following:

1. The owner must provide proof to the Board of Health that a maintenance service agreement has been obtained with an authorized manufacturer’s representative after the initial two year service period provided by the manufacturer for any system with mechanical components. For non-mechanical systems that do not require a service agreement, pumping and service records must be submitted to the Health Department by the homeowner at least every 5 years. Operation Permits Expire Annually for Mechanical Systems and every 5 years for Non Mechanical Systems
2. Allow access to the property so Health District staff may perform HSTS operation inspections as needed, with an understanding that an annual operation inspection fee will be charged if the homeowner does not provide evidence of inspection by a registered service provider within the time frame of the Operation Permit, as well as re-inspection fees if the system is found to be operating improperly and re-inspections are needed to assure compliance with proper operating requirements.
3. For NPDES discharging systems, contract with a registered service provider to take samples to determine level of treatment, effluent quality, and other parameters required by the household general NPDES permit at a minimum of once per year and provide service records when those results reach the OEPA action limits. Must provide sample results to Marion Public Health. Owner / Operator will be required to reimburse the Health District for the cost of sampling if the owner/operator does not provide annual sampling results.
4. System shall be maintained as designed and annual inspections and maintenance shall be done by an authorized registered service provider for mechanical systems. Annual inspections shall include all minimum maintenance requirements as set by the manufacturer and/or Marion Public Health.

I further understand that I must disclose the nature of this septic system on a Residential Property Disclosure Form when I sell this property to a new buyer and that the new buyer will be required to ensure the same maintenance, inspections and testing requirements of this Operation Permit.
